HIGH-TECH FLANGE AND FITTINGS TRADING COMPANY LTD..

ZECHNER HIGH-TECH STEEL COMPANY

We are an Austrian enterprise thinking in international dimensions!

Ing. Meinrad Zechner

„Our trademark is flexibility and a maximum of customer care. These qualities will continue to give us the competitive edge!“

the Zechner high-tech steel Company was founded by civil engineer Meinrad Zechner in 1989, and now belongs amongst the most reputable special steel component companies in Austria.

Founded in 1995, the High-tech flange and fittings Trading Company Ltd. supplements the range of our merchandise in the high-quality steel sector. It has grown into one of the most sizeable Austrian exporters.

:: Only change guarantees the future!

Today, the future potential of a company depends in a large measure on its ability to adapt to a changing market. We have a small but highly motivated team and with it, we constantly make ideas pertaining to modern and dynamic company structures happen in reality. It is our passion for the materials that drives us towards constant improvements, and towards giving new meaning to the phrase “pleasing our customers”.

:: It is continuity that ensures our success!

Amongst the guiding principles for our future are: a consistent entrepreneurial policy, the challenge of continuous improvements in research and development, high competence standards, a consistently high level of quality, and honest relations to customers, suppliers and staff. Our work processes are meticulously planned, and we possess a high degree of metallurgical knowledge. This has resulted in a company reputation as a reliable supplier of standard parts as well as individually crafted products.

„High-grade stainless steel“ (Reg.soc.)

:: Quality

Technical demands are constantly on the increase, requiring a consistent and high level of quality.

Securing the quality levels and improving our benchmarks, while at the same time reducing environmental risk factors are firmly embedded parts of our entrepreneurial philosophy. Our staff possess a work attitude that is geared towards increasing the quality of both goods and services, which we consider to be an indispensable requirement for the effectiveness of their quality-related and environmentally aware work.

We carefully check our suppliers and only use high quality raw materials for our product line.

It is an ever-present challenge and an aspect of our corporate identity to provide 100% customer satisfaction and more!

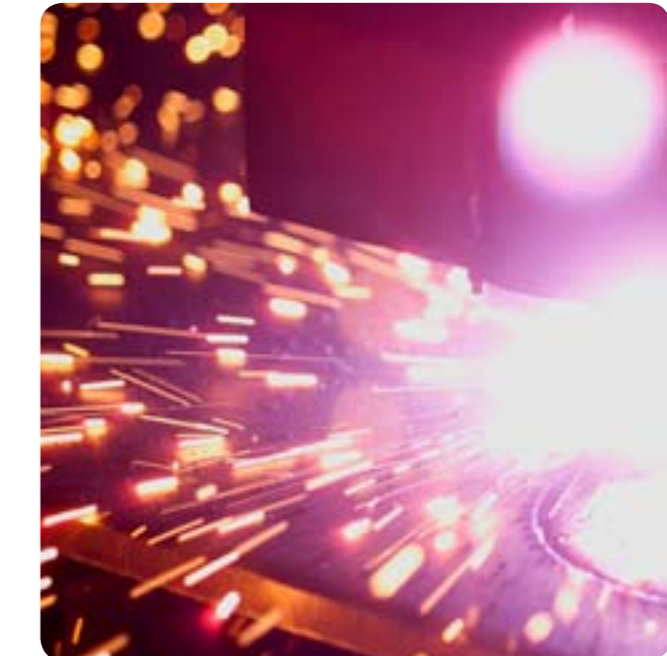

:: Environment

We are committed to the principle of responsibility towards both customers and the environment. This leads us to seek wide ranging cooperation with health institutions, environmental agencies and experts.

Utmost care guides our product development programmes and systems in the areas of corrosion protection, pickling and general maintenance solutions for high grade steel, welding additives, specially designed OKS lubricants, as well as oils and fats for food processing machinery.

Moreover, our customers are provided with web-based relevant security data.

We protect the environment by way of environmentally sound procedures, plants and logistics. Naturally, we respect all laws and official rules. As far as is possible and economically sensible, we lead remainder substances back into the materials circuits.

Core competences

Aiming at success that we wish to share with our customers, we develop, produce and sell (throughout Europe) at competitive prices products of the highest quality.

This we do in the areas of:

- :: food technologies
- :: chemical industries
- :: plant and machinery construction
- :: architecture

- screws and standard parts
- pipes and bar stocks
- special rotary parts
- dowel screws
- high-tech steel decorative programmes
- ropes and their accessories
- assembling materials
- round link chains and accessories
- screw thread fittings and mountings
- metal fittings
- sanding tools
- sanding material systems
- pickling and treatment substances
- welding additives
- flanges
- welding flanges
- oils and fats, special lubricants for food processing machinery
- roller bearings
- heating oil and diesel additives
- corrosives for pipes
- innovative systems towards reducing energy demands and protecting the environment

For detailed product information go to www.edelstahltechnik.at

We supply within agreed time and quality parameters and can be flexible towards changes of customer wishes. We identify customer needs and are able to create competitive advantages for them via shared developments and tailor-made services.

:: Our partners

In the pursuit of high quality and economic feasibility, we utilize the know-how and the capacities of our carefully selected suppliers.
